#### THE MONTH OF APRIL

April begins with a day of fun and jokes known as April Fool's Day. Also called All Fools' Day, it has been celebrated for several centuries by different cultures, its exact origins remain a mystery.

April always begins on the same day of week as July,

April is when in the northern hemisphere buds begin to open and things start to grow again after the winter. April showers bring forth May flowers.

The first Sunday of April is daffodil Sunday in Victorian times families picked Daffodils from their garden and took them to local hospitals to give to the sick.
